Professional Summary

Full Stack MERN Developer, Ethical Hacker, and Cybersecurity Enthusiast with expertise in building secure, scalable, and high-performance web applications. Skilled in React, Node.js, Express.js, MongoDB, FastAPI, penetration testing, vulnerability assessment, secure authentication, end-to-end encryption, and MITRE ATTACK-based threat detection. Passionate about secure software engineering, blockchain technologies, and developing innovative, user-focused solutions.

Education

IIIT Kottayam

Bachelors in Computer Science with Cyber Security

2023 – 2027

CGPA : 7.2

Vijayagiri Public School

Higher Secondary Education

2020 – 2022

Grade : 91.6

Technical Skills

Languages: Python, C, C++, Java

Frontend: HTML, CSS, Javascript, React

Backend: Node.js, Express.js, REST APIs, JWT, MVC

Databases: MongoDB, MySQL

Developer Tools: VS Code, Git, GitHub, Postman, AWS

Work Experience

Full Stack MERN Developer

Jul 2025 – Jan 2026

Labmentix Private Limited

- Developed and maintained full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- Designed RESTful APIs, integrated JWT authentication, optimized database queries, and collaborated with the development team to deliver scalable, secure, and responsive applications.
- Implemented responsive user interfaces, fixed bugs, improved application performance, and participated in code reviews following industry best practices.

Projects

CRYPTCHAT | MERN Stack, Socket.IO, MongoDB, JWT, RSA-OAEP, AES-256-GCM

May 2026

- Built a security-focused real-time chat application using the MERN stack with Socket.IO, featuring End-to-End Encryption (E2EE) for confidential messaging.
- Implemented hybrid encryption using RSA-OAEP, AES-256-GCM, and PBKDF2 to securely exchange keys, encrypt messages, and protect user's private keys on the client side.
- Integrated JWT authentication, HTTP-only cookies, Helmet, rate limiting, encrypted message storage, online user tracking, live notifications, and persistent chat history.

THREATLENS | Python, React, FastAPI, Node.js, MongoDB, JWT

June 2026

- Designed and developed a SOC simulation platform that parses Linux authentication logs and correlates security events to identify malicious authentication behavior.
- Engineered a rule-based detection engine capable of identifying brute-force attacks, root account targeting, username enumeration, and distributed authentication attacks with MITRE ATTACK mapping and risk scoring.
- Implemented secure authentication, interactive dashboards, alert management, and historical analysis using React, FastAPI, Express, MongoDB, and Chart.js.

Certificates

MERN Stack Web Development

Nov 2024 – Jun 2025

Udemy

MasynTech

- Built responsive full-stack web applications using React, Node.js, Express.js, and MongoDB.
- Implemented REST APIs, JWT authentication, and completed multiple real-world MERN projects.

Ethical Hacking

Sept 2025 – Dec 2025

Udemy

zSecurity

- Learned penetration testing, vulnerability assessment, and web/network security fundamentals.
- Gained hands-on experience with Kali Linux, Nmap, Wireshark, and Metasploit for security testing.
